Summary

Backend engineer with 6 years of experience building Python APIs, data models, and cloud services for B2B SaaS products.

Experience

Senior Software Engineer, Lumen Workflows (2022-01 - Present)

Built FastAPI services handling 8M requests/day; designed PostgreSQL schemas and cut slow-query volume by 70% with indexing and query rewrites; introduced GraphQL for the customer dashboard; mentored three engineers.

Technologies: Python, FastAPI, PostgreSQL, GraphQL, Redis, AWS

Software Engineer, Harbor Analytics (2019-06 - 2021-12)

Developed Django REST APIs and Celery pipelines for reporting; containerized services with Docker and moved deployments to AWS ECS.

Technologies: Python, Django, Celery, Docker, AWS

Skills

Python, FastAPI, PostgreSQL, GraphQL, Docker, AWS, Redis, Celery, system design, code review

Education

B.S. in Computer Science, University of Texas at Austin

Projects

queue-metrics: open-source Celery queue monitoring dashboard built with FastAPI.

This is a fictional resume for trying the TalentFlow AI demo.
